ABOUT

Network Engineer Trainee with CCNA training certification and currently pursuing CCNP Enterprise training from Network Bulls. Possesses hands-on experience with Cisco routers and switches, enterprise network design, routing and switching technologies, and network services. Has hands-on experience with Python and Linux environments, supporting network automation, troubleshooting, and infrastructure management.

SKILLS

Networking Fundamentals: OSI Model, TCP/IP, IPv4 Addressing, IPv6 Addressing, Subnetting.

Routing Technologies: Static Routing, Default Routing, RIP, EIGRP, OSPF, BGP, MPLS Fundamentals, HSRP.

Switching Technologies: VLANs, SVI, Trunking (802.1Q), VTP, STP, EtherChannel (LACP).

Network Services & Security: DHCP, DNS, NAT/PAT, SSH, ACLs.

Network Tools & Simulation: EVE-NG, Cisco Packet Tracer, Wireshark.

Programming & Automation: Python, Git, GitHub, Linux.

PROJECTS

Design and Simulation of Hierarchical Enterprise Network Architecture | EVE-NG, Cisco IOS, Cisco Routers & Switches

- Designed and implemented a scalable three-tier enterprise network architecture comprising Core, Distribution, and Access layers to support efficient communication across multiple departments.
- Configured VLANs, Inter-VLAN Routing, 802.1Q Trunking, VTP, NAT/PAT, DHCP, DNS, SSH v2, and Layer-2 security mechanisms to provide secure, organized, and centrally managed network communication.
- Implemented OSPF, HSRP, EtherChannel, Rapid PVST+, and dual ISP connectivity to ensure high availability, fault tolerance, load optimization, and reliable network operation.
- Deployed centralized enterprise services including DHCP, DNS, NAT, and web hosting services while performing network verification and troubleshooting using Cisco IOS commands and connectivity testing tools.

AI-Powered Assistive Vision System for the Visually Impaired | Python, Raspberry Pi, OpenCV, OCR, TTS, Face Recognition

- Developed assistive vision modules focused on face recognition and real-time user interaction to improve accessibility and situational awareness for visually impaired users.
- Optimized the text-to-speech and speech-to-text pipeline to reduce latency and minimize dependence on internet connectivity, enabling faster and more reliable user interaction.
- Integrated OCR, audio feedback, and face recognition capabilities into a unified system designed for real-time operation and practical daily use.

EXPERIENCE

Network Bulls – Network Engineer Trainee

Jan 2026 – Present

- Gained intensive hands-on experience working with enterprise networking concepts through practical lab sessions and real-world network implementation scenarios.
- Built, tested, and troubleshoot complex network topologies while developing a structured approach to fault isolation and connectivity issue resolution.
- Performed network verification, monitoring, and troubleshooting using industry-standard methodologies and Cisco IOS diagnostic commands.

IIT Mandi – Research Intern (CAIR)

Jun – Jul 2025

- Developed a multi-stage data processing pipeline for railway infrastructure analysis involving data preparation, validation, and automated workflow execution.
- Worked extensively in Linux-based environments while managing large datasets, optimizing processing workflows, and improving execution efficiency.
- Gained practical experience working with compute-intensive workloads, automation scripts, and resource management in a high-performance research environment.

EDUCATION

Jawaharlal Nehru Govt. Engineering College, Sundernagar, HP

2022 – 2026

B.Tech – Computer Science Engineering (AI & ML) | CGPA: 7.75

CERTIFICATIONS & ACHIEVEMENTS

- CCNP Enterprise Training** – Currently Pursuing.
- CCNA Training Certification** – Completed at Network Bulls, Gurugram (2026). [Certificate]
- GATE DA 2025 Qualified** – Demonstrated strong analytical aptitude and problem-solving skills. [Score Card]
- Deep Learning** | NPTEL (IIT Ropar) | 80% marks [Certificate]
- Winner – Project Gallery Competition** at college technical fest for developing an AI-based solution. [Certificate]
- Drone Bootcamp – IIT Mandi** – Gained exposure to embedded systems, sensor integration, and wireless communication concepts. [Certificate]
